SENIOR SDET | PLAYWRIGHT & TYPESCRIPT | TEST AUTOMATION ENGINEER

Result-oriented **Automation Test Lead / Senior SDET** with 7+ years of hands-on experience architecting, scaling, and maintaining robust UI and API test automation ecosystems across enterprise applications. Proven expertise in designing high-performance automation frameworks from scratch using **Playwright (TypeScript), Selenium (Java), and Karate**, with strong experience in **CI/CD, API testing, and test automation architecture**. Experienced in leveraging **AI-assisted test engineering, Prompt Engineering, and Model Context Protocol (MCP)** to accelerate test case generation, E2E automation development, test documentation, and improve overall test coverage. Strong track record of leading QA initiatives, mentoring engineers, reviewing automation frameworks, and driving software quality at scale.

TECHNICAL SKILLS

- Test Automation: Playwright, Selenium WebDriver, Karate Framework (UI/API)
- Programming Languages: TypeScript, Java, JavaScript
- AI & Advanced Technologies: Prompt Engineering, Model Context Protocol (MCP), AI-Assisted Test Automation
- Test Automation Architecture: Page Object Model (POM), Data-Driven Testing, BDD, TestNG
- CI/CD & DevOps: Bamboo, GitHub Actions, Jenkins, Git, Bitbucket
- API & Testing Tools: Postman, Swagger, Jira, QMetry
- Methodologies: Agile, Scrum, Sprint Planning, Test Strategy & Automation Ownership
- AI-Assisted Test Engineering: Designed E2E prompts to generate functional test cases, automated test scenarios, and test documentation; integrated generated test cases with Jira for improved test coverage and traceability.

PROFESSIONAL EXPERIENCE

Capgemini – Senior Consultant | Automation Test Lead

Aug 2024 – Aug 2026

- **Framework Architecture:** Architected and deployed a highly scalable, robust Playwright automation framework from scratch using TypeScript across enterprise applications, boosting test authoring velocity by 30%.
- **AI-Driven Automation:** Leveraged Model Context Protocol (MCP) servers to automate complex test execution workflows and applied advanced prompt engineering techniques to optimize AI-assisted test generation and validation.

- **CI/CD Optimization:** Integrated automated test suites seamlessly into Bamboo CI/CD pipelines, establishing continuous quality gates that cut deployment-blocking feedback loops by 40%.
- **Execution Efficiency:** Engineered a parallel test execution strategy that optimized resource utilization and reduced regression execution times by over 50%.
- **Technical Leadership:** Serve as the central point of contact for automation strategy, conducting meticulous code reviews, establishing best practices, and mentoring a team of QA engineers in transitioning to TypeScript-based automation.

Cybage Software – QA Engineer

Jan 2022 – Aug 2024

- **Full-Stack Automation:** Authored and maintained comprehensive end-to-end UI and API automated test scenarios leveraging Playwright and Karate Framework.
- **Suite Maintenance:** Successfully managed and scaled regression and smoke automation suites, ensuring minimal script flakiness and maintaining a 98%+ pipeline pass rate.
- **Agile Collaboration:** Collaborated closely with cross-functional development, product, and DevOps teams within fast-paced Agile sprints to ensure timely delivery of high-quality software patches.

Aptara – Test Analyst

Feb 2019 – Nov 2021

- **Legacy Scripting:** Developed, executed, and maintained modular Selenium WebDriver automation scripts using Java and TestNG.
- **Functional Validation:** Performed extensive regression, functional, and exploratory testing to identify critical business logic defects.
- **Specialized Testing:** Spearheaded critical QA and testing activities for complex eLearning migration projects, ensuring zero-defect data transitions.

KEY ACHIEVEMENTS

- **Greenfield Frameworks:** Successfully designed, built, and evangelized 2+ production-grade automation frameworks from the ground up, reducing total reliance on manual testing efforts.
- **CI/CD Quality Gates:** Achieved 100% automated nightly builds by integrating parallelized regression testing into active CI/CD infrastructure.
- **Talent Upskilling:** Up-skilled and mentored junior manual testers into high-performing automation engineers fluent in modern frameworks and asynchronous programming.

EDUCATION

* Bachelor of Engineering in Information Technology

Pune University – Graduated: 2017
